

Project Documentation

Project Team Members:

1. Pratik Zadafiya (200454635)
2. Rudra Thakkar (200469309)
3. Shahrbanoo Gholami (200470958)
4. Sreyas Menon (200465986)

Project background & needs:

A couple of years ago RCE Saskatchewan had a website full of information that did not meet their requirements at all, even they had a separate website for their Awards. But last year, the RCE website and Awards website were redesigned and merged into one website which is <https://saskrce.ca/>. Currently they want Profiles and Projects page to be refined by providing information in a more attractive, useful, and eye-catching way. Apart from that, making this webpage user-friendly. Lastly, by implementing some visuals and features to enhance the customer engagement and make the strong presence of RCE Saskatchewan in this digital world.

North star customers:

The volunteers, the organizers, and all the people who are connected with the project.

Carryover customers:

Educators, local communities, and other users who want to know more about SDG and UN goals or general users. (people who want better environment / society)

Project Assumptions:

- We are having a list of projects
- Links of the project recorded videos if any
- Links of social media groups e.g. Facebook, Instagram
- Organizers information (all details)

- Details of each project
- Working on profiles and projects is an assumption
- Using WordPress for making the webpage

Project Constraints:

- Lack of knowledge of WordPress
- It is hard to make a responsive webpage
- User interaction with static websites is not practical
- Frequency of meeting of organizers with users (due to personal reasons or time)
- The problem might arise for maintaining legitimacy when concerned with interaction and opinion poll
