

Summarized customer notes

Customer check-ins: February 10, 2022

- Comments on the team ideas:
 - The opinion poll is very interesting.
 - It is a good idea that SDGs are prominent.
- Comments on the team questions:
 - It sounds good that we just display brief information for each project and provide this feature that if someone needs more information download and keep the whole details.
 - It is a really good idea that UN Goals are displayed with their numbers.
 - Currently, details of upcoming events are not available, but it does not mean that you cannot do it in the future.
 - The virtual chat box is a good idea for the future.
 - For having information about basic types of the projects to use in the opinion poll, currently just projects names are available under the awards section. But if you need more information, we can provide them.
- General comments:
 - Considering status for projects is a good idea because it may take a long time for projects to get results.
 - As RCE Saskatchewan is a volunteer organization they cannot dedicate someone to monitor the chat box. Maybe it is a better idea to just put a comment box.
 - Currently, it is not a good idea to display a video for each project, if you want you can just put the link to that video.
 - You should think about other ways of displaying information on the profiles and projects page. It is not a good idea to use web frames with fixed boxes to display the information, because they are not easy to use.
