

## Summarized customer notes

Customer check-ins: March 15, 2022

- Customer comments on the team's high-fidelity prototypes:
  - Your job was pretty cool and you did a lot of job
  - I like the project details pop-up. It is great. It is so clean, organized and we have everything that we need right there. And, the download option is also a great option. You do not have to do it but I really like the option.
  - As well, the organizers tab is really helpful.
  - I really like the idea of hovering over SDGs to show their related information.
  - Search categories are really good.
  - I am curious how you will implement your map view.
  - I like the Local Sustainable Programs part too.
- Instructor comments on the team's high-fidelity prototypes:
  - In addition to the project and organizer tab, I like the suggestion tab. And, I really like the tabular way. But, in the mobile version, I like to have one project already open.
  - I like the idea of searching by education. Because, there might be an elementary school teacher searching for projects.
  - I like the idea of the status of projects; ongoing, done, etc. I really love that, it's a really nice touch.
  - I really like the idea of highlighting partner projects (Local Sustainable Projects). Highlighting their projects can encourage them in their way.
