Summarized customer notes

Customer check-ins: April 7, 2022

- Customer comments on the team's first MVP:
    - About the popup of the SDG goals, it is better if we can have it automatically for the first time and then if users want to refer to it again, they use based on their demand.
    - Your job was pretty cool!

- Instructor comments on the team's first MVP:
    - Map view is currently separate from search results? (We answered: yes, for the first MVP we could just develop it separately).
    - Well done! Thank you so much.
